SUMMARY

MERN Stack and **Cross-Platform Mobile Application Developer** with hands-on experience building and shipping modern web and cross-platform mobile applications using **React**, **Next.js**, **Angular**, **Node.js**, and **Flutter**. Skilled in developing scalable frontend architectures and secure backend systems using **TypeScript**, **Node.js**, **Express.js**, and **NestJS**, delivering high-performance **RESTful APIs**, robust **database management** (**PostgreSQL**, **MongoDB**), and **authentication systems**. Strong **Dart** programming background with advanced **state management** (**GetX**, **Bloc**, **Provider**), **multi-flavor builds**, **localization**, and **Dart isolates**. Experienced in **end-to-end development**, integrating **third-party APIs**, implementing **responsive UI/UX designs**, writing **test cases**, and optimizing applications through efficient **performance techniques** and **cloud-based solutions**.

SKILLS

- **Core Tech Stack:** React.js | Next.js | Flutter | Dart | Node.js | NestJS | PostgreSQL | TypeScript
- **Frontend & UI:** JavaScript | TypeScript | Responsive UI/UX | React.js | Next.js | Angular | Tailwind CSS | HTML5 | CSS3
- **Mobile & State:** Flutter | Dart | Cross-Platform Apps | Reusable Widgets | GetX | Bloc | Provider | Dart Isolates | Multi-Flavor Builds | Localization
- **Backend & Cloud:** Node.js | Express.js | NestJS | RESTful APIs | JSON | JWT Authentication | Docker | AWS | CI/CD Pipelines | Git & GitHub
- **Databases & APIs:** PostgreSQL | MongoDB | MySQL | Firebase | Data Modeling & Optimization | Third-Party APIs | Payment Integrations | Real-Time Sync
- **Quality & DevOps:** Unit Testing | Codacy Analysis | Code Reviews | Debugging | Lazy Loading | Code Splitting | Efficient Rendering | Scalability Enhancements

WORK EXPERIENCE

Junior Flutter Developer

Axian Group — Islamabad, Pakistan | October 2025 – March 2026

- Built and shipped cross-platform fintech features in **Flutter** for regional telecom applications, maintaining high responsiveness and reliable offline-to-online transitions.
- Integrated secure **RESTful APIs** for financial transactions, authentication, and live balance synchronization across accounts.
- Structured application state using **GetX** with client-side form validations and optimized widget rebuilds to keep transaction flows stable.

Front-End Developer

BX Technologies — Islamabad, Pakistan | April 2024 – October 2024

- Built responsive web applications in **React.js**, converting Figma specifications into modular, accessible UI components.
- Integrated **Framer Motion** to create smooth micro-interactions and route transitions without blocking main-thread rendering.
- Reduced bundle size and initial load times using route-based **code splitting**, image optimization, and component **lazy loading**.

Front-End Developer

Tecklogics — Islamabad, Pakistan — January 2024 – March 2024

- Developed responsive client-facing interfaces in **Angular**, ensuring consistent layout and behavior across mobile, tablet, and desktop viewports.
- Constructed reusable UI component libraries with **Tailwind CSS**, CSS Grid, and Flexbox to standardize styling across screens.
- Connected backend **RESTful endpoints** with RxJS observables for live data updates and robust error handling.

Front-End Developer

Cyber Reconnaissance & Combat — Islamabad, Pakistan — August 2022 – December 2022

- Developed front-end dashboard modules in **Angular**, integrating third-party component libraries for security monitoring interfaces.
- Implemented **JWT authentication** flows with route guards and role-based access control to protect restricted views.
- Optimized runtime performance by introducing lazy-loaded feature modules and efficient **state management**.

PROJECTS

Mixx Senegal

Flutter | Dart | GetX | Codacy

- Maintained a production **Flutter** mobile app with **multi-language localization** (French and Wolof) serving regional users.
- Configured multi-flavor build targets (dev, preprod, prod) with distinct package identifiers and API environments for automated **CI/CD**.
- Offloaded JSON parsing and cryptographic operations to background **Dart isolates**, keeping the UI at an uninterrupted 60fps.
- Implemented **Mini Apps** framework within the host app, allowing third-party partner services to run embedded via secure webviews.
- Built **Bank-to-Wallet** and **Wallet-to-Bank** rails, connecting mobile telecom wallets with commercial banking APIs for direct transfers.
- Delivered an end-to-end **Salary Advance** module, including eligibility verification, loan tenure selection, and instant wallet disbursement.

Mixx Tanzania

Flutter | Dart | GetX | Codacy

- Ran **Codacy** static code analysis to eliminate duplicate patterns, resolve complexity warnings, and enforce consistent code standards.
- Refactored monolithic screen widgets into shared, isolated **reusable components**, cutting code duplication across feature modules.
- Authored unit and widget **test cases** covering core payment journeys, preventing regressions during weekly deployment cycles.

Perfumora – Luxury Perfume E-Commerce Platform

Visit Site ↗

Next.js | React Three Fiber | Three.js | Supabase | TypeScript | Tailwind CSS

- Built a full-stack luxury e-commerce platform with an interactive **3D WebGL** bottle customizer using React Three Fiber, custom glass shaders, and procedural Web Audio.
- Architected a multi-app repository with a **Next.js** customer storefront and a Vite management portal connected to a shared **Supabase PostgreSQL** instance.
- Applied PostgreSQL **Row Level Security (RLS)** policies with **Supabase Auth** RBAC to isolate customer records, orders, and administrative inventory controls.
- Wrote a PL/pgSQL database function **(RPC)** with row-level locking to eliminate race conditions and double-selling during checkout surges.
- Integrated **Resend** for automated transactional receipts and added in-browser background removal for product asset uploads.

Orca Dashboard

Angular | Material UI | PrimeNG | Bootstrap

- Built a responsive analytics dashboard in **Angular** visualizing text **sentiment analysis** with interactive filter controls.
- Rendered dynamic time-series charts and distribution breakdowns categorizing feedback into positive, negative, and neutral metrics.
- Standardized table pagination, status badges, and data export features using a consistent **UI system** with PrimeNG and Bootstrap.

Personal AI Educator

Next.js | NestJS | PostgreSQL | JWT | Framer Motion | DeepSeek API | Google Maps API

- Built a full-stack learning platform with **Next.js** and **NestJS** that generates structured course modules and interactive assessments.
- Integrated the **DeepSeek API** with structured prompting to generate curriculum outlines, study notes, and automated quizzes on demand.
- Engineered the backend architecture with **NestJS**, PostgreSQL, and **JWT authentication**, integrating Google Maps API to locate nearby study centers.

Diet App

Flutter | Firebase | TensorFlow | Google Maps API | Geolocation

- Built a **Flutter** mobile application that calculates daily macronutrient targets and generates meal schedules based on user biometric data.
- Integrated an on-device **TensorFlow** Lite model to analyze dietary logs and recommend healthier ingredient substitutions.
- Configured **Firebase** Authentication, Cloud Firestore real-time listeners, and Cloud Storage for meal tracking and profile sync.

EDUCATION

Bahria University — Islamabad, Pakistan
Bachelor of Information Technology — 2021 – 2025

Government Gordon College — Rawalpindi, Pakistan
Intermediate in Computer Science (ICS, BISE) — 2019 – 2021

Airports Security Force Public School — Rawalpindi, Pakistan
Matriculation in Computer Science (SSC, FBISE) — 2018 – 2019

CERTIFICATION

Meta Front-End Developer Professional Certificate — Coursera — Verify ↗
