UMAIR SHAHID

FULL-STACK DEVELOPER | REACT | NEXT.JS | NODE.JS | FLUTTER | RESTFUL API DEVELOPMENT

+92-321-5215701 / SHAHIDUMAIR622@GMAIL.COM / RAWALPINDI, PAKISTAN
GITHUB / PORTFOLIO / LINKEDIN

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building and shipping modern web and cross-platform mobile applications using React, Next.js, Angular, Node.js, and Flutter. Proven expertise in developing scalable frontend architectures and secure backend systems using Node.js, Express.js, and NestJS, delivering high-performance RESTful APIs and seamless user experiences. Strong Dart programming skills with state management (GetX, Bloc, Provider), multi-flavor builds, localization, and Dart isolates. Experienced in integrating third-party APIs, implementing responsive UI/UX designs, writing test cases, and optimizing applications through efficient state management and performance techniques. Strong understanding of database management, authentication systems, and cloud-based solutions, with the ability to deliver end-to-end development. Known for strong analytical thinking, clear communication, and effective collaboration.

EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY | BAHRIA UNIVERSITY, ISLAMABAD / 2021 – 2025

SKILLS

- **Frontend Development:** JavaScript | TypeScript | React.js | Next.js | Angular | HTML5 | CSS3 | Tailwind CSS | Responsive UI/UX
- **Mobile Development:** Flutter | Dart | Cross-Platform Apps | Reusable Widget Architecture
- **State Management:** Redux Toolkit | GetX | Bloc | Provider
- **Backend Development:** Node.js | Express.js | NestJS | RESTful APIs | JSON | Authentication (JWT)
- **Database Management:** MongoDB | PostgreSQL | MySQL | Firebase | Data Modeling & Optimization
- **Testing & Code Quality:** Unit Testing | Codacy | Code Reviews | Debugging
- **App Architecture & Localization:** Multi-Flavor Builds (Dev, Preprod, Prod) | Localization | Dart Isolates
- **API & System Integration:** REST APIs | RESTful Services | Third-Party APIs | Payment Integrations | Real-Time Data Synchronization
- **DevOps & Tools:** Git | GitHub | Docker | AWS | CI/CD Pipelines | Version Control
- **Performance Optimization:** Lazy Loading | Code Splitting | Efficient Rendering | Scalability Enhancements

WORK EXPERIENCE

JUNIOR FLUTTER DEVELOPER, AXIAN GROUP, ISLAMABAD, PAKISTAN / OCT 2025 – MAR 2026

- Developed a cross-platform fintech mobile application using Flutter, ensuring scalability, performance, and seamless user experience.
- Integrated secure RESTful APIs supporting financial transactions, authentication, and real-time synchronization across platforms.
- Implemented state management using GetX, along with validations and optimized UI rendering, improving performance, security, and overall stability.

FRONT-END DEVELOPER, BX TECHNOLOGIES, ISLAMABAD, PAKISTAN / APR 2024 – OCT 2024

- Developed high-performance web applications using React.js with modern libraries ensuring scalability and responsive interfaces.
- Implemented Framer Motion animations delivering smooth transitions, enhancing user engagement and application interactivity.
- Optimized performance through lazy loading, code splitting, and efficient rendering improving speed and user experience.

FRONT-END DEVELOPER, TECKLOGICS, ISLAMABAD, PAKISTAN / JAN 2024 – MAR 2024

- Built responsive web applications using Angular framework ensuring scalability, optimization, and cross-device compatibility.
- Developed reusable UI components using Tailwind CSS, Grid, and Flexbox improving consistency and maintainability.
- Integrated RESTful APIs enabling real-time data synchronization ensuring smooth functionality and enhanced user experience.

FRONT-END DEVELOPER, CYBER RECONNAISSANCE & COMBAT, ISLAMABAD, PAKISTAN / AUG 2022 – DEC 2022

- Developed secure and scalable web applications using Angular with modern UI libraries and frameworks.
- Implemented authentication systems enhancing application security, improving access control, and ensuring safe user interactions.
- Optimized performance using state management, lazy loading, and efficient rendering improving scalability and responsiveness.

PROJECTS

MIXX SENEGAL FLUTTER | DART | GETX | CODACY

- Developed and maintained a cross-platform Flutter application with multi-language localization for a diverse regional user base.
- Configured multiple app flavors (dev, preprod, prod) enabling streamlined, environment-specific builds and deployments.
- Utilized Dart isolates to handle intensive background processing, improving app performance and UI responsiveness.
- Built and shipped Mini Apps, enabling in-app live views of other applications within a unified experience.
- Developed Bank-to-Wallet and Wallet-to-Bank transfer features, allowing users to move funds seamlessly between their app wallet and local bank accounts.
- Implemented Salary Advance, enabling users to access short-term loans directly through the app.

MIXX TANZANIA FLUTTER | DART | GETX | CODACY

- Identified and removed duplicate code across the codebase using Codacy static analysis, improving maintainability and code quality.
- Refactored existing code into reusable components, reducing redundancy and improving long-term scalability.
- Fixed bugs and wrote test cases covering key application flows, increasing test coverage, improving Codacy metrics, and reducing regression risk.

PERFUMORA — LUXURY PERFUME E-COMMERCE PLATFORM NEXT.JS | REACT THREE FIBER | THREE.JS | SUPABASE | TYPESCRIPT | TAILWIND CSS | LIVE SITE

- Developed a full-stack luxury e-commerce platform featuring an interactive 3D WebGL product experience with physically-based glass refraction and procedural Web Audio synthesis.
- Architected a multi-app system comprising a Next.js storefront and a Vite-based administrative portal, backed by a shared Supabase PostgreSQL database.
- Implemented Row Level Security (RLS) policies and role-based access control using Supabase Auth, ensuring secure separation between admin and customer data access.
- Built an atomic order-processing transaction (RPC) with row-level locking to guarantee inventory integrity under concurrent checkout requests.
- Integrated Resend for transactional emails and in-browser AI-powered background removal for product photography, streamlining the catalog management workflow.

PERSONAL AI EDUCATOR NEXT.JS | NESTJS | POSTGRESQL | JWT | FRAMER MOTION | DEEPSEEK API | GOOGLE MAPS API

- Developed AI-powered educational platform delivering structured lectures and interactive learning experiences for students globally.
- Integrated DeepSeek API generating dynamic content including lectures and automated quizzes for adaptive learning.
- Built secure backend using NestJS with JWT authentication and Google Maps API integration.

ORCA DASHBOARD ANGULAR | MATERIAL UI | PRIMENG | BOOTSTRAP

- Designed responsive dashboard visualizing social media sentiment analysis using interactive components and data representations.
- Implemented charts and graphs representing sentiment trends including positive, negative, and neutral insights.
- Built consistent UI system using modern frameworks ensuring scalability, usability, and design uniformity.

DIET APP FLUTTER | FIREBASE | TENSORFLOW | GOOGLE MAPS API | GEOLOCATION

- Developed cross-platform application delivering personalized diet plans based on user health profiles and preferences.
- Implemented TensorFlow-based AI model recommending healthier meal alternatives dynamically for improved nutrition outcomes.
- Utilized Firebase services for authentication, database management, and real-time data synchronization across application.
